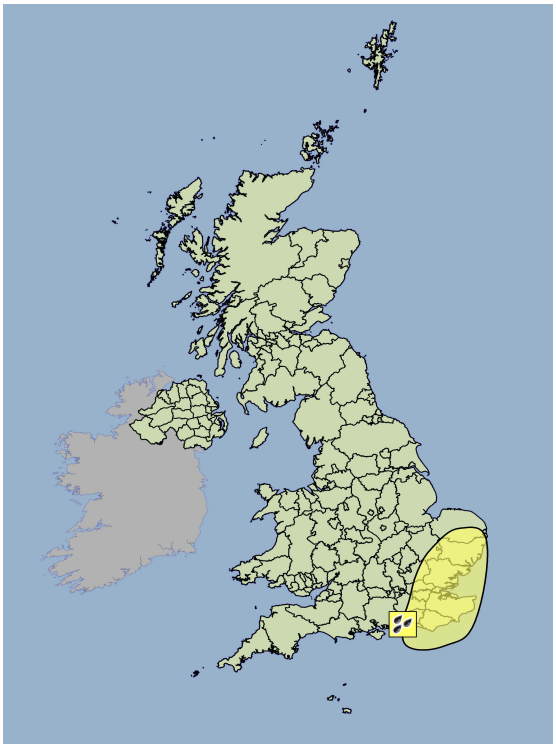
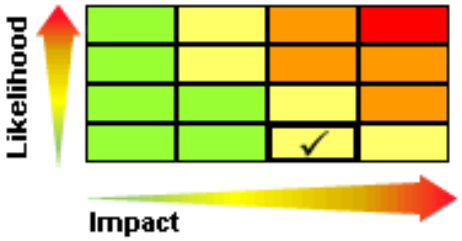
National Severe Weather Warning Service





Chief Forecasters Assessment
Developments later on Sunday will lead to formation of a low pressure area close to the boundary of the warm humid airmass, near or over southeast Britain. There are a number of factors which will influence how developed this feature becomes, which in turn will determine how much of the country is affected by heavy rain and stronger winds during Monday. On this occasion there is a particularly wide range of possible outcomes, with subsequent updates to the Alert potentially seeing the area either expanded or shrunk.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **01:00 on Mon, 31st Aug 2015** until **23:59 on Mon, 31st Aug 2015**

Further areas of heavy rain or thundery showers may affect parts of southern and eastern England on Bank Holiday Monday, with an additional risk of strong winds developing. It should be noted that there is a larger than average uncertainty in the areas likely to be affected, with updates to this Alert very likely. Meanwhile, the public should be aware of the risk of further localised flooding and impacts on holiday activities.
